CHOOSE QUALITY FRY-HOLDING TECHNOLOGY

Want to hold your fried foods, without cooking them or drying them out? Glo-Ray® heat technology from Hatco offers you the ability to keep your product at its optimum temperature, ready-to-serve. The ceramic element effectively heats and holds food longer – while still offering ample serving and working space. The GRFHS Series large capacity slotted holding bin prevents soggy product by allowing the heat to envelop your fried product. The accessory hardcoated fry ribbon effectively retains 15° to 20°F (8°-11°C) more of food temperature than the industry standard of stainless steel. And the portable unit works with standard 120 volt power (except MPWS which is 120/208V), so no installation is needed. Best of all, Hatco offers a range of styles and accessories to suit your operation. The Choice is Yours.

- Ceramic heating elements allow for ample space between warmer and food bin to empty baskets.
- Thermostatically-controlled heated base maintains uniform holding temperatures from below.
- Portable – plugs into standard 120V outlet (except MPWS which is 120/208V).
- Slotted holding bin prevents soggy product.

- Various hardcoated fry ribbons stage boxed or bagged products for quick-serve areas.
- Optional right- or left-hand cutout for easy fry basket access (GRFHS-21 model only).

GLO-RAY® FRY STATION WARMERS

GRFS and GRFSC
Fry Station Warmers

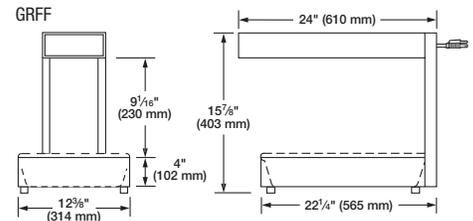

Features include a swing-away post mount, On/Off toggle switch, and attached cord with plug. GRFS models with metal sheathed heating elements are available with 10," 11," 12," or 13" (254, 279, 305, or 330 mm) clearance. GRFSC models with ceramic elements have 16 3/4," 18," or 20" (425, 457, or 508 mm) clearances. Available in 120 volts, single phase.

PORTABLE FOODWARMERS

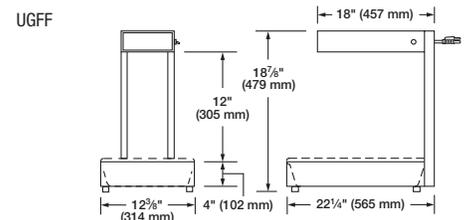

GRFF Glo-Ray®
Portable Foodwarmers

A specially designed stand that keeps food holding pans off the work area and allows easy access from three sides. The air space between pan bottom and countertop serves as an effective insulation to prolong serving life. Available in 120 volts, single phase.

UGFF Ultra-Glo®
Portable Foodwarmers

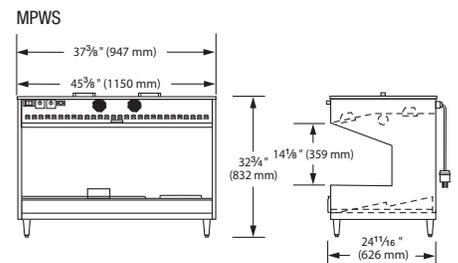

Perfect for fry stations, Ultra-Glo is designed with a greater distance between the heating element and the holding pan than the standard foodwarmer. The distance, combined with the compact element housing, makes it easier to access the product while maintaining proper food temperatures. The special ceramic element emits radiant heat that blankets the target surface and food product. Available in 120 volts, single phase.

MULTI-PRODUCT WARMING STATION

Multi-Product
Warming Station

Hatco's Multi-Product Warming Station safely holds hot fried foods at optimum serving temperatures in kitchen work areas. The unit is designed for maximum durability and performance, with minimum maintenance. Available in 120/208 volts, single phase.
